Do you know who produced the first channel sale of DS5000 storage? Shelley Murray of Mid-Range. She made

the sale to Niagara General Hospital, who will use DS5000 as their primary production storage device. She also expanded the sale to include 15 SAN Switches and a Blade Center. That's

proof we can take a lead, run with it – and close the deal. For more information, contact our IBM rep, Cathie Mostowyk (phone 416-232-2556, email:
